Profile

Results-driven CS student, with desire for Software Engineering roles. Effective communicator and fast learner with strong desire for knowledge and self-improvement.

Education

University of California, Berkeley

Berkeley, CA, USA

Bachelor of Arts in Computer Science

Aug 2019 – May 2022

Courses taken:

GPA: 3.48 / 4.0

Structure and Interpretation of Computer Programs, Data Structures and Programming Methodology, Great Ideas in Computer Architecture, Discrete Mathematics and Probability Theory, Efficient Algorithms and Intractable Problems, Computer Security, Database Systems, Artificial Intelligence, Principles and Techniques of Data Science

Skills

Programming: Python, Java, C, C++, Golang, Lisp/Scheme, OCaml, JavaScript, Dart, Kotlin, Swift

Languages: Bahasa Indonesia, English, Mandarin Chinese

Awards: World Math Invitational 2018 Silver Medalist, Harvard Model Congress Asia 2018 Honorable Mention

Experience

Apple

Cupertino, CA, USA

Junior Software Development Engineer

July 2022 – present

Shopee Indonesia

Jakarta, DKI, Indonesia

Product Management and Software Development Intern

Jun 2021 – Aug 2021

- Led development for internal data analysis program using optical character recognition (OCR) with 99% accuracy, reducing data analysis time by 95%.
- Designed and performed user-acceptance testing for client application with more than 120 million users.
- Wrote product requirements document (PRD) and worked with business team to define specifications.

Data Science Intern

Jun 2020 – Sep 2020

- Segmented users based on their value to the company to maximize churn reduction.
- Utilized Python, SciKit-learn, and PyTorch to classify potential churners among users, reducing churn rate by 30%.
- Modularized the model to enable future teams to expand upon work with additional features.

UC Berkeley EECS Department

Berkeley, CA, USA

Tutor, CS 61A

Aug 2021 – Dec 2021

- Led weekly small-group discussion sections for 5-6 students, covering concepts and problem-solving approaches in Python. Topics covered include recursion, OOP, interpreter design and regular expressions.
- Reviewed academic integrity violations and recommend appropriate action.
